

Weather Lessons 1

Name: _____

Date: _____

This test covers the lessons on cloud types.

SECTION 1 Indicate if the following statements are true or false.

- 1) Cumulus clouds are usually puffy in appearance.
a) **True**
b) False

- 2) Stratus clouds are associated with thunderstorms.
a) True
b) **False**

- 3) Cirrus clouds are low level clouds.
a) True
b) **False**

- 4) As long as it is not directly overhead, lightning is safe.
a) True
b) **False**

- 5) Observing cloud patterns can help predict weather.
a) **True**
b) False

SECTION 2 Please complete the following statements using the word bank provided.

Note: Each word can only be used once.

Word Bank	Cauliflower Top	Hail
Ice Crystals	Lightning	Stratocumulus

- 6) A "Cb" cloud often has a [**Cauliflower Top**].
- 7) Cirrus clouds are typically made up of [**Ice Crystals**].
- 8) [**Stratocumulus**] clouds are flat clouds that have some puffiness visible throughout the layers
- 9) [**Lightning**] and [**Hail**] are two weather conditions that can occur with thunderstorms.

Section #3 Our lessons also included some "Fun Facts" and "Brain Teasers".

Let's see if you can remember what they were without using a word bank.

Earn additional points by matching the following terms with their definitions.

10) b Look like clouds, but are man-made.

11) c Makes ripples on a puddle.

12) a Does not disturb a puddle.

a) Drizzle

b) Contrails

c) Light Rain
